Continuation of 5. does NOT place the application in condition for allowance because:

With respect to claims 1, 2, 4-10 and 12-16, Applicant's arguments are not persuasive. Applicant's Prior Art Fig. 1 discloses a ground portion formed around the liquid crystal display and, in view of Hansell, Figs. 1-3 clearly discloses a reinforcement connector 8 (or the spring finger) connected to a ground pin connector 17 of the header 20 of the PCB 21 and a connection cable 10 of an external system. Accordingly, the reinforcement connector supports the ground of said printed circuit board.

Finally, claims 3 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and intervening claims.
